

CQIN COMMAND for iCue Corsair Keyboard - eBay

Tutorial

Saturday, July 13, 2019 11:56 PM

These are the keyboard commands and shortcuts i created for eBay listing.

KEYBOARDS TO GET

Corsair K55 about \$50

<https://www.amazon.com/gp/product/B01M41K1U/>

Or higher end

Corsair K95 about \$150-200

<http://www.amazon.com/gp/product/B01NS1SKY/>

Both have the same keys, the K95 being a bit more sensitive and takes a bit of getting used to, BUT it has an awesome volume control on the right and is a nice aluminum body. I own both keyboards and very happy with both.

YOU NEED TO DOWNLOAD ICUE SOFTWARE and set up the settings below:

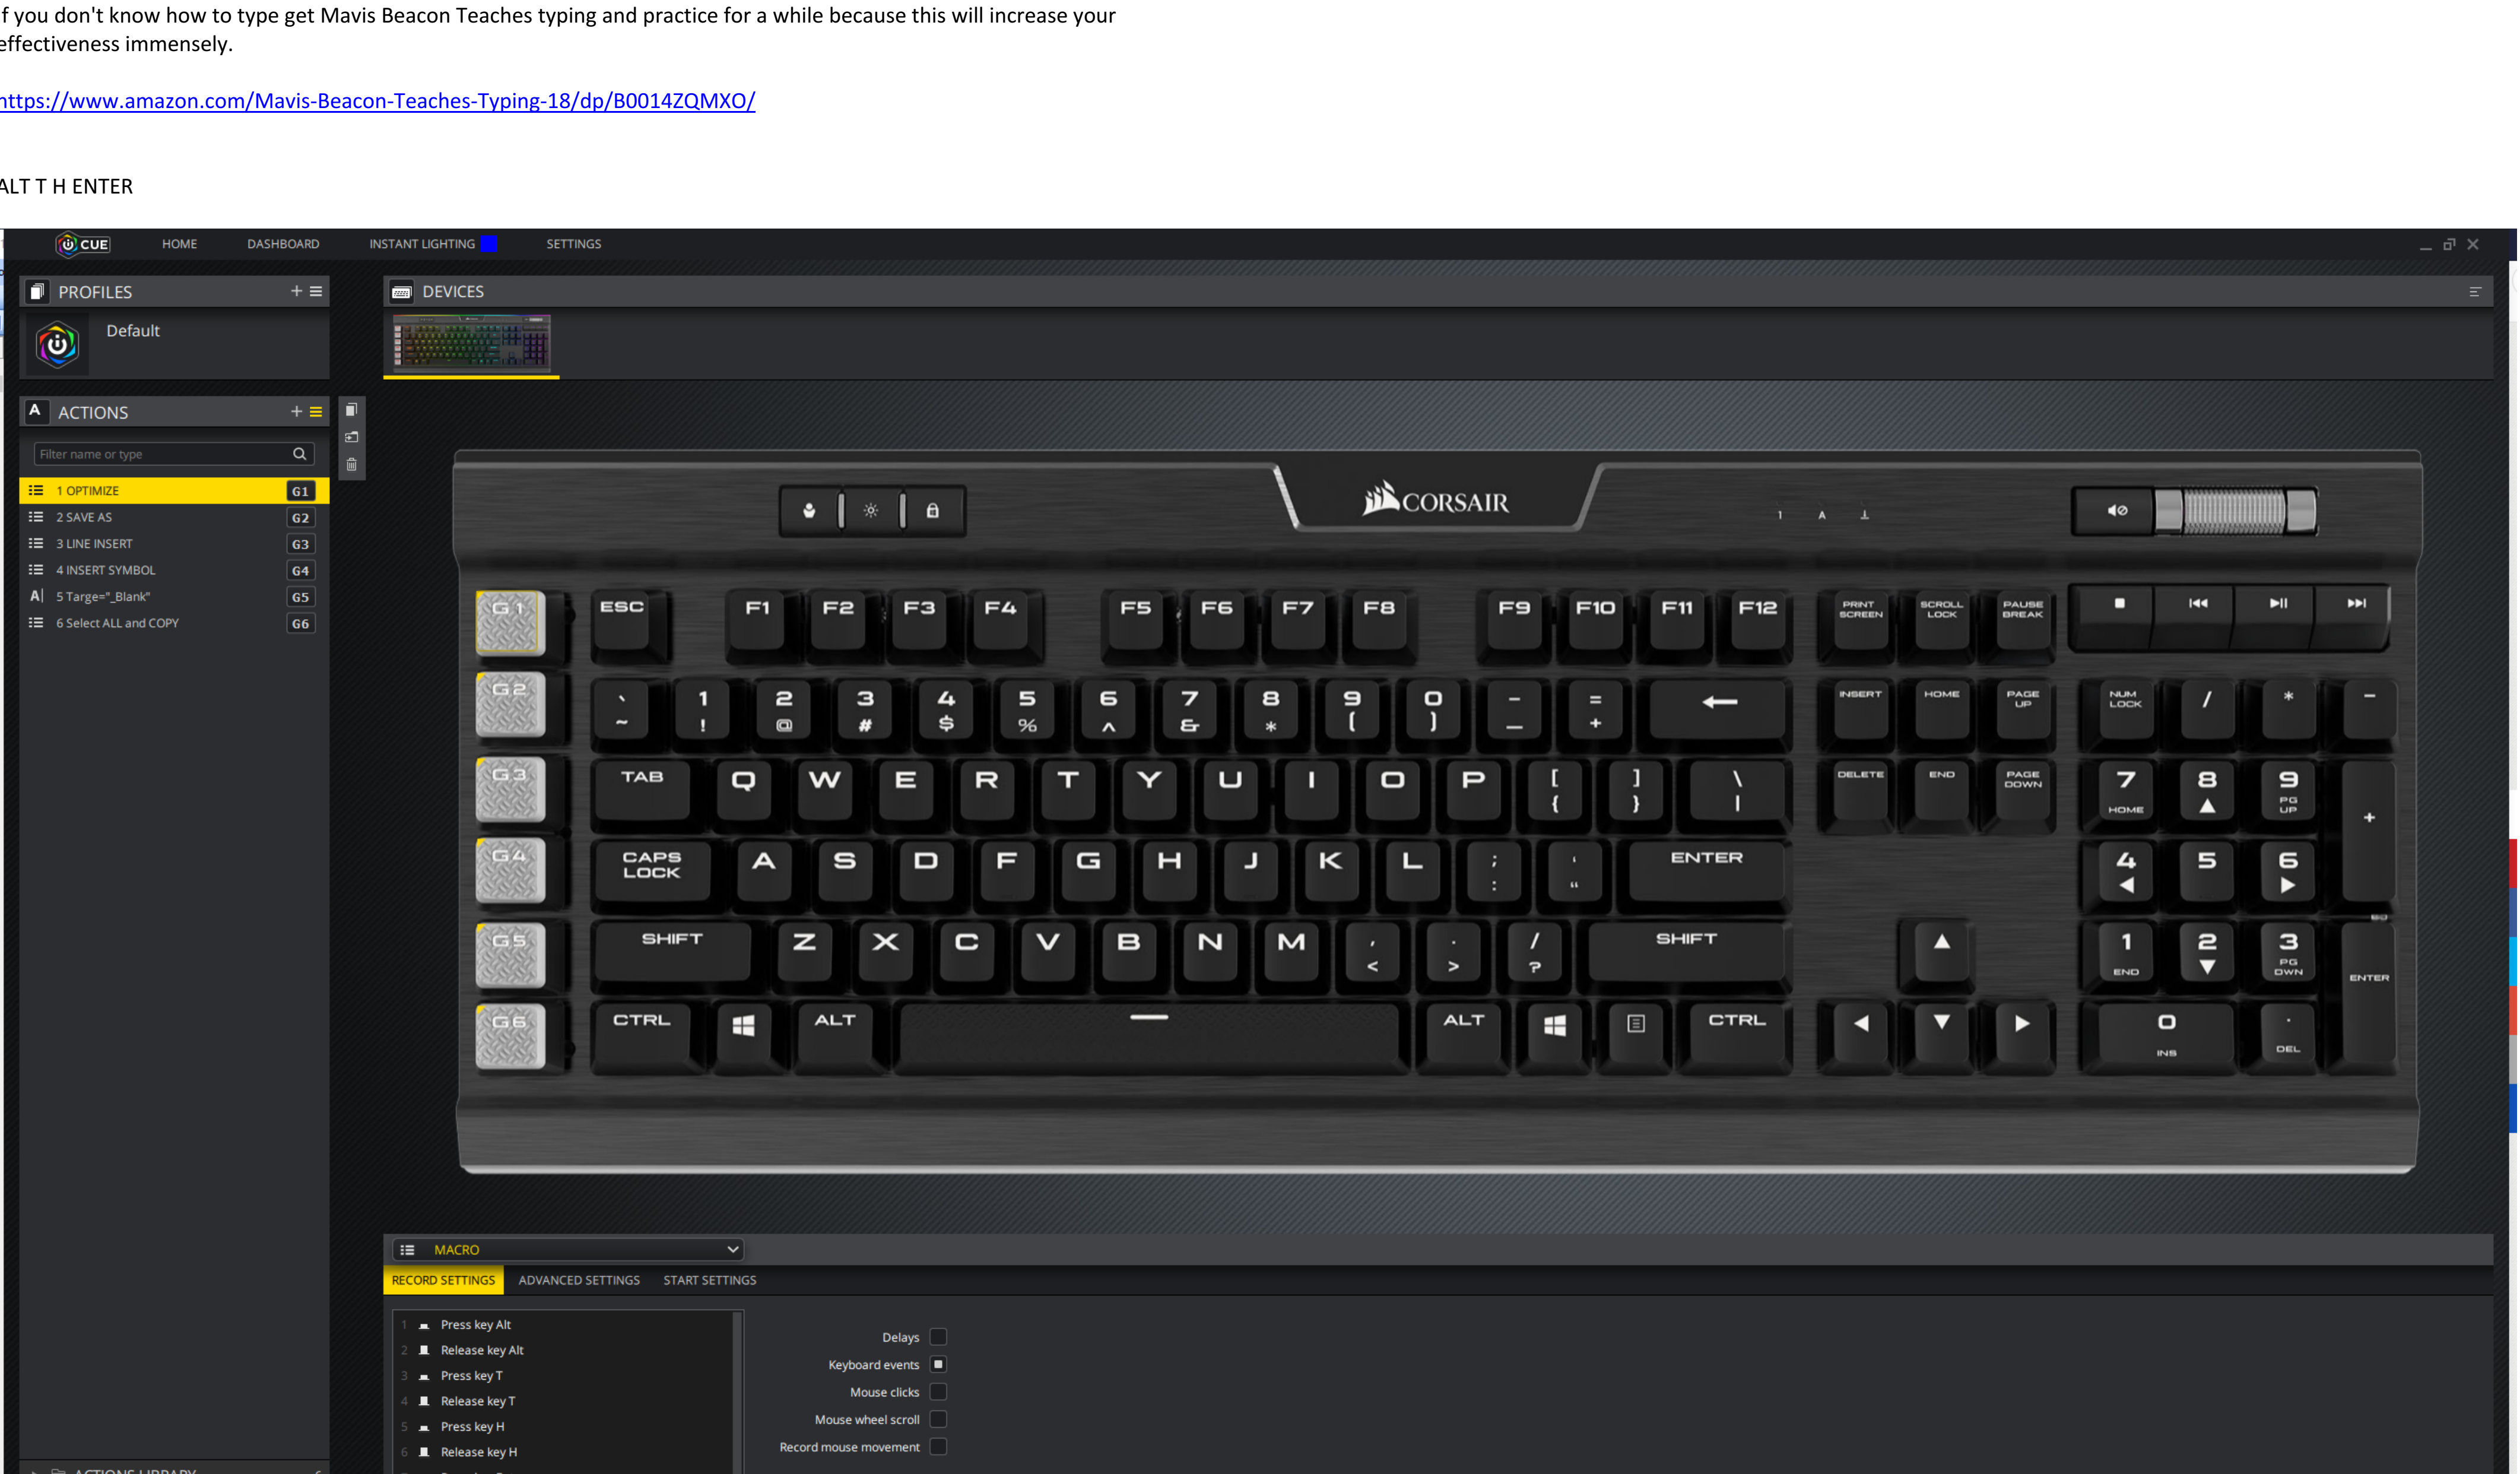

ICue is the software suite that allows you to program the keys on the left hand side

<http://www.corsair.com/us/en/CueFull disclaimer>

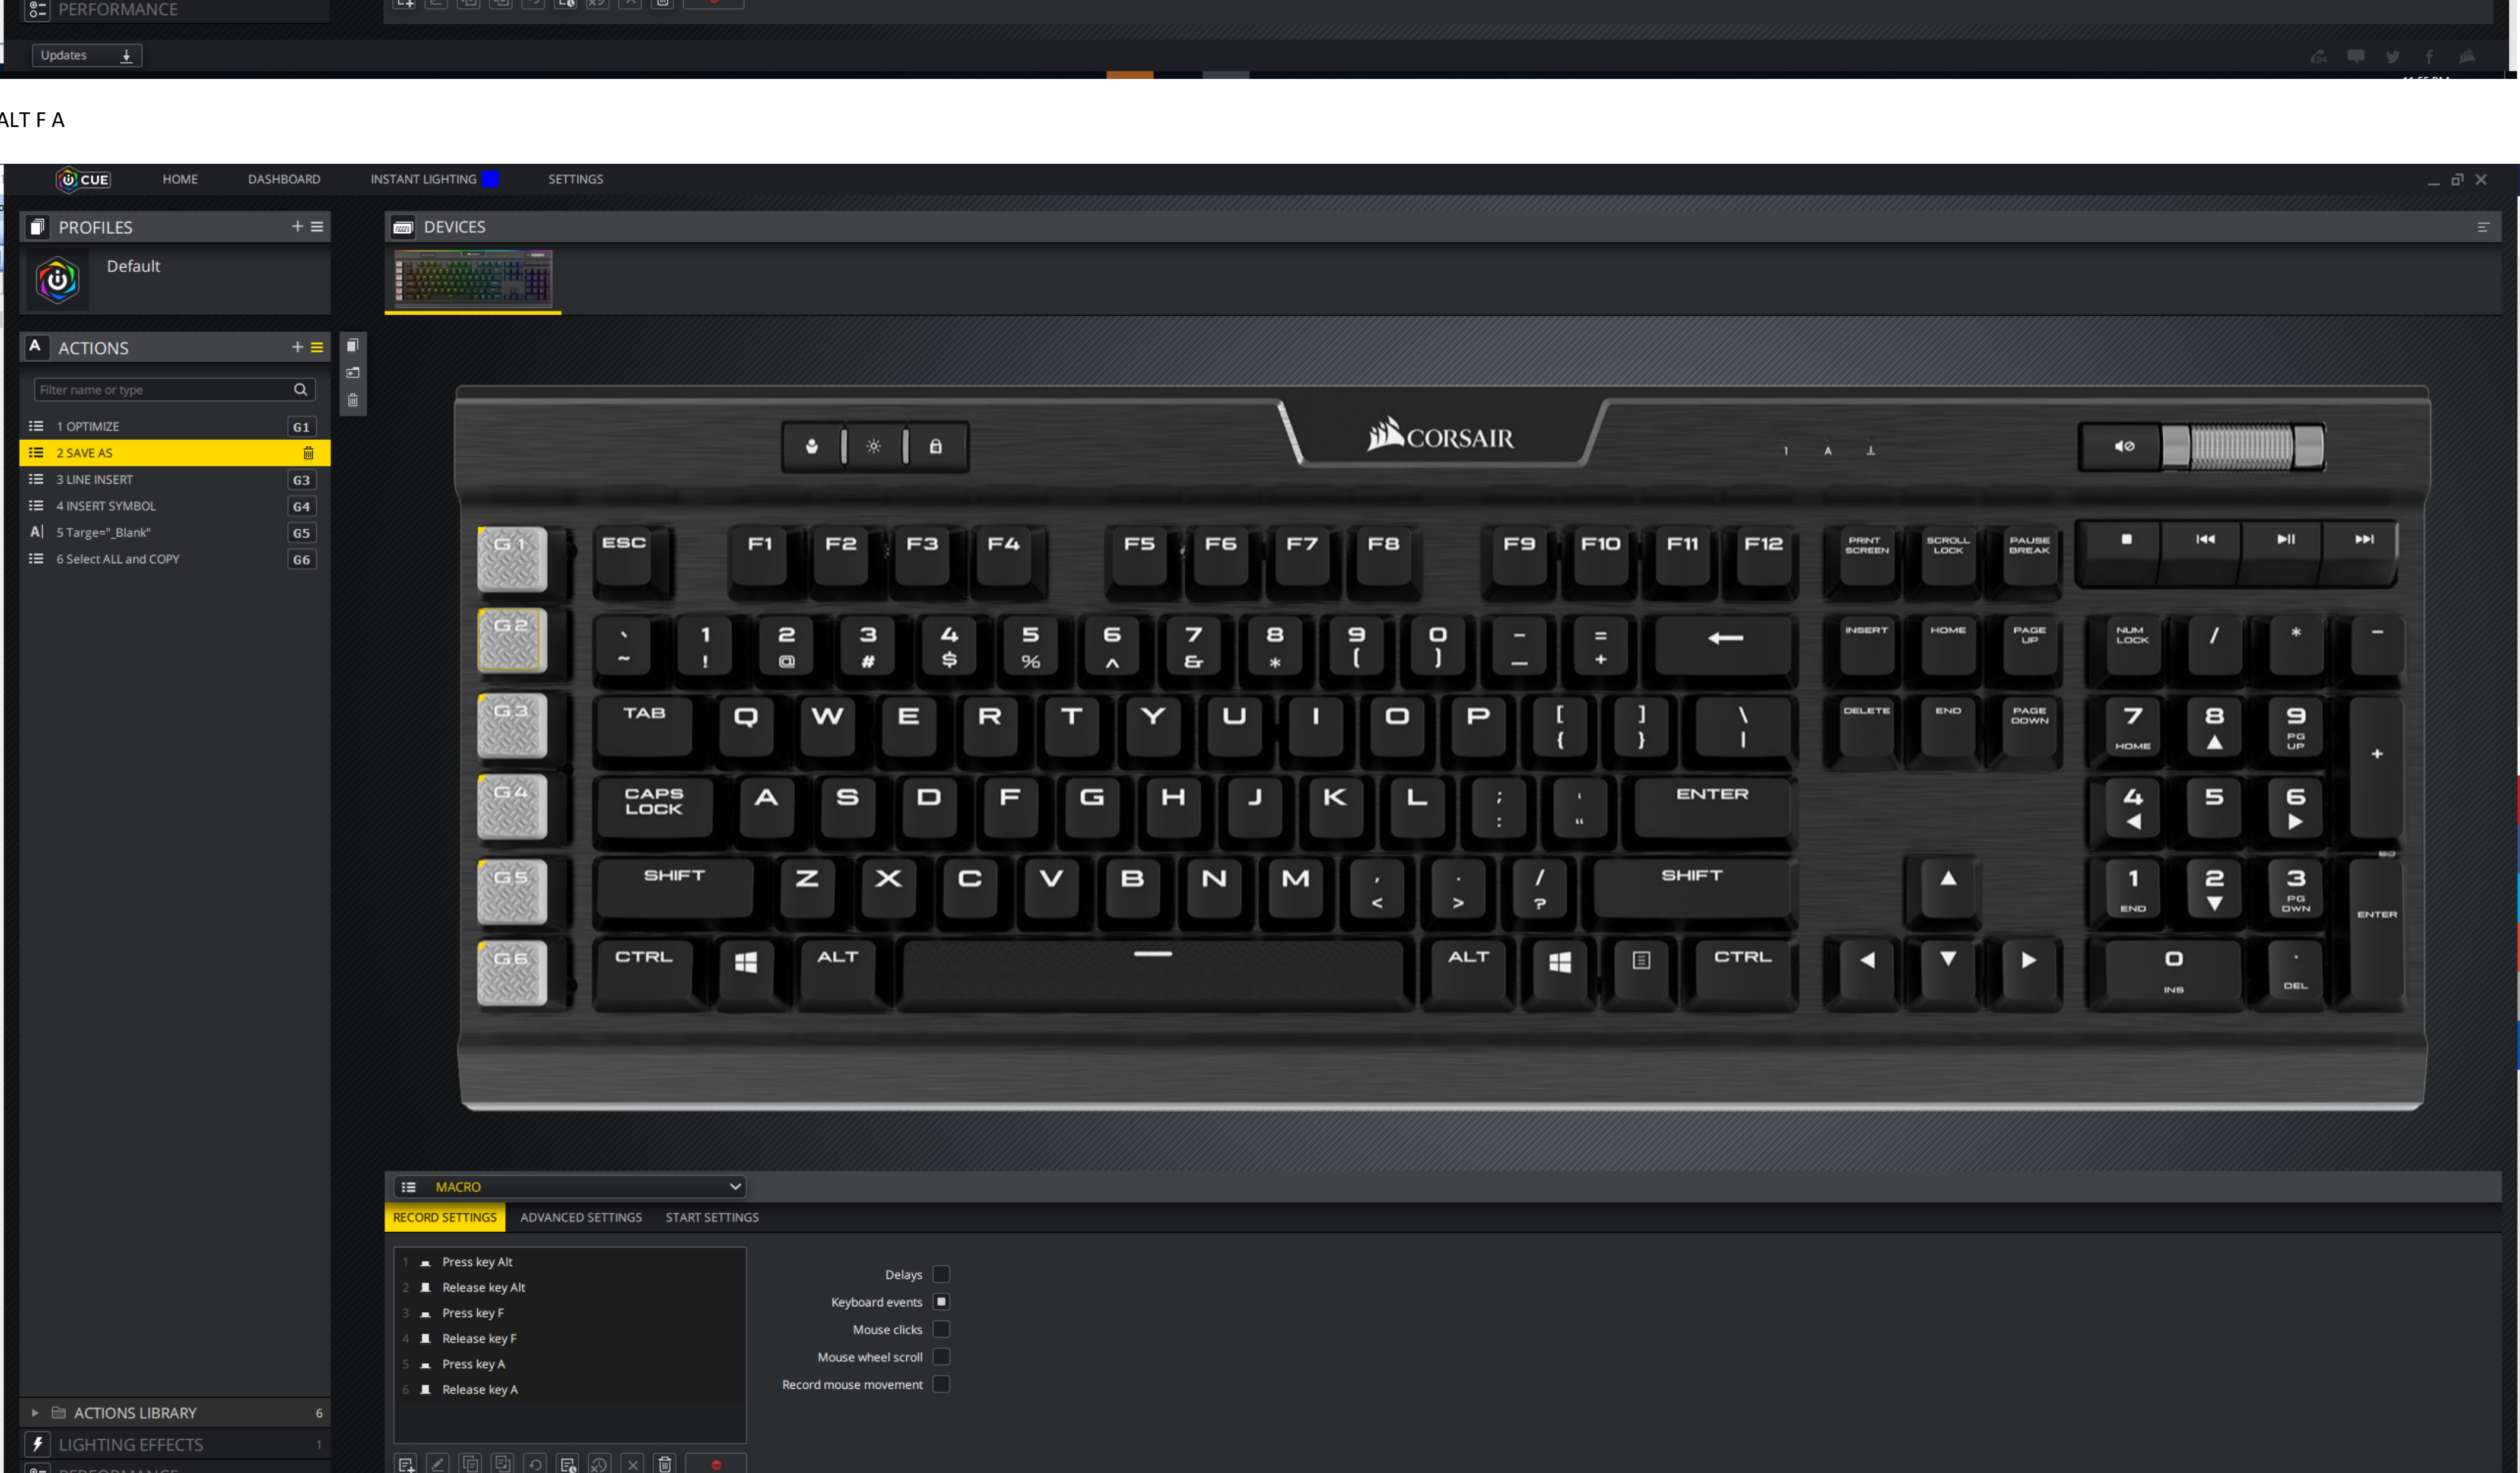

If you don't know how to type get Mavis Beacon Teaches typing and practice for a while because this will increase your effectiveness immensely.
